BIO   ABOUT ME

I consider myself an active, dynamic person committed to my job, firm believer in team-work and improving the team, if it's in my hands.

Good humor is a part of my every day that I have been working in the computing world.

I like challenges, solving problems, and contributing new ideas.

All of this always forces me to be as updated as I can be.

HOBBIES   INTERESTS

The kitchen is one of my passions, I think it is a perfect way to share and enjoy, involving yourself and your own creativity in what you prepare.

Another of my hobbies is to play games, especially using consoles, I like first person shooters and graphic adventure games with challenges.

Since we were kids, me and my brothers have always watched movies. I keep doing it and I appreciate the time we live in, with the comfort of streaming services, although going to the theathers and sitting down to enjoy is still unique.

As a curious person, I have always been drawn to science. Whenever I can I consult outreach articles, whatever the subject.

TECHNOLOGY DIRECTOR - WIZELINE

MADRID - SPAIN

NOV 2021
NOW

As Technology Director, I have worked coordinating different projects, building offers and forming teams and individuals.

Among my tasks, I was part of the leading team of the business unit in EMEA, coordinating and defining Wizeline's Business Unit offer. The Technology Director's responsability is the collaboration with the clients, supporting the Software development cycle and paying attention to the project's objectives.

I have worked defining cloud migration strategies. I'm currently in charge of the certification and partnership process for GitHub and I'm the Cloud reference in Wizeline EMEA.

Another of my functions is being sponsor/coach of the people working in these projects. This consist of people management and business growth path management as well.

SENIOR ARCHITECT BAOSS- LEROY MERLIN

MADRID - SPAIN

AGO 2020
NOV 2021

As a Senior Architect I have developed my work in the design and implementation of the migration to the cloud of Leroy Merlin's legacy systems, being GCP the target provider.

Using Infrastructure as Code (IAC), using Terraform, Ansible, and python.

Development of modules, operational and deployment models. Product installation support. I act more like a cloud expert / insfraestructure expert

SENIOR ARCHITECT IN GFT

MADRID - SPAIN

FEB 2019
MAY 2020

As a Senior Architect I worked on two projects, the first supporting in the design of the API solution for consumption of Applications of Retail Banca, in México, and the definition, design and construction with my team of the architectural pieces necessary for the development of microservices.

Azure, AWS, API, DevOps, Go, Security, XACML

The second project was the design of an Inner Source solution for a global model, using Mono Repository and automations for the automatic construction of native mobile applications using components.

& Investment Banking

NOV 2017

FEB 2019

AWS, DevOps, Security, API Gateway

SECURITY ARCHITECT
📍 MADRID - SPAIN

Design and definition of a security solution for API's and Microservices, adapting it to the specific needs of internal applications and external exposures. The solution looked at security requirements, deployment control, authentication, and authorization models, etc.

To be able to perform this solution, it was built from a Fork of an Existing API Gateway, although only part of the source functionality was used. Security policies were defined for access to services, as well as an authentication model for legacy applications .

JUN 2016

NOV 2016

TECH CONSULTANT
📍 MADRID - SPAIN

Various jobs as a technological consultant and pre-sales help, generating their offers and designs. Most of the offers were intended for retail, AAPP and energy.

JUN 2016

JAN 2014

Azure, Security, Innovación, Pos. Indoor, Realidad Aumentada y Virtual

INNOVATION MANAGER
📍 MADRID - SPAIN

Development of new line of business in digital transformation. Definition of several projects based on Big Data, Cloud Computing, Smart Objects, Indoor positioning, and new technologies for the segments of AAPP, Retail, TELCO, Energy and Industry.

During my time as Innovation Manager, work was carried out on various projects and the construction of a new offer for the market. Within the projects that were carried out, BigData solutions (for CDR analytics in Judicial requirements -TELCO), mobility, indoor positioning, virtual reality, augmented reality, use of microservices, etc. were applied.

A mobility solution was made especially for museums, where a technological demonstration model was applied in which mobility, indoor positioning, augmented reality and virtual reality were integrated. Unfortunately the project was eventually lost to issues outside the team.

JUN 2013

Azure, Security, Innovación, Pos. Indoor, Realidad Aumentada y Virtual, App Moviles

SENIOR ARCHITECT IN CC. ARCH. & MOBILITY

📍 MADRID - SPAIN

From the management of Sopra Spain a competence center was created that aimed to accommodate new business models using new technologies. I participated in several cross-division projects, supporting them by providing pre-sales support to channel the model to follow.

The objective of the Competence Center was to solve the needs of business units and present new business models. Supported by the teams of each division, the design of new mobility solutions, the definition of architectures, the use of methodologies, etc. was supported.

To generate these projects, it was necessary to work with the commercials to be able to make offers with this vision. To this end, the link with the commercials was strengthened and all the proposals that came to indicate whether we should participate in the offers were analyzed.

Telefónica

JUN 2003

JUN 2013

Sistemas (Infraestr.), Cloud Comp. Seguridad, Comm, Storage, Virtualización

SYSTEM ARCHITECT

📍 MADRID - SPAIN

I have been in all the business areas of Telefónica Móviles Spain, as an infrastructure architect, the last years working in the CORE systems of the company. The tasks of Systems Architect were to define the infrastructure for the projects, the availability management of the project, even if purchases had to be made, the security around the project and its communications.

For 10 years I have worked with the best professionals from which I have learned a lot and I have gained a lot of experience.

JUN 2001

JUN 2003

DATA BASE ADMINISTRATOR

◉ MADRID - SPAIN

I joined Telefónica Móviles as DBA SQL Server, performing the tasks of defining database maintenance, and then performing a consolidation and reorganization of the servers in Telefónica Móviles..

With the idea of changing scenery, I began a new stage of my life, trying to start from scratch. I entered the Telefónica Mobile BBDD team to manage the Database servers. I made a consolidation by creating a four-node cluster on a Unisys ES7000 team, resulting in considerable licensing savings as up to that point licenses were paid per server.

Professional

NOV 1989

JUN 2001

PARTNER MODULO SISTEMAS SL

◉ NECOCHEA - ARGENTINA

Partner in my company where we developed various systems during the years I was there. In the year 1989 the need for professionals in systems was high and there was little presence, so, with some colleagues from University, we founded the company where we started working. During those years we grew up, some left the company and others came in, but the initial spirit of generating software and developing solutions was always maintained.
We worked in various areas: Development of special systems within the field of Cereal Brokerage (Grain Market), Hotel System, Development of Ad Hoc Commercial Management Systems (several), Development of temperature control systems in grain storage silos

NOV 2016

NOW

ENTERPRENEUR SYMBIOTICAPP SL - TERRAM BUBULAE SL

◉ MADRID - SPAIN

I am a natural-entrepreneur: hand developed a specific project (Big App) and a secondary project being prepared to launch and test the business model. I continue with both projects alive today.

DEVELOPMENT LANGUAGES

Development in various languages, preferably C#, Go, C++, with knowledge of development in other languages such as Python, Java, etc.

85% | LEVEL : EXPERT   EXPERIENCE : 30 YEARS

C#   GO   C++   PYTHON   JAVA

ARCHITECTURE (INFRASTRUCTURE)

Knowledge of expert infrastructure, Linux, Windows, Unix, TCP/IP, Security, Cloud Computing, I have worked for 10 years with the CORE systems in Telefónica Mobile.

85% | LEVEL : EXPERT   EXPERIENCE : 17 YEARS

Cloud Comp.   Linux   Unix   Windows   TCP/IP   Security   ...
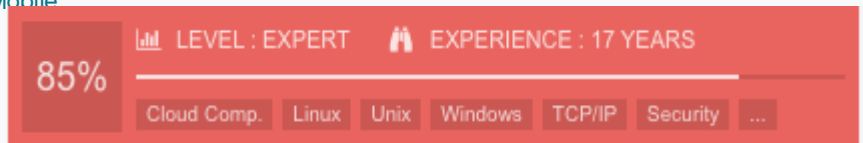

ARCHITECTURE (DEV)

As development architect, I have the knowledge for the design of complex applications, component design, optimization and application security and efficiency. I believe in the "Green Code": clean and efficient.

85% | LEVEL : EXPERT   EXPERIENCE : 30 YEARS

Patterns   Clean Code   Architecture   Optimization   Test   ...
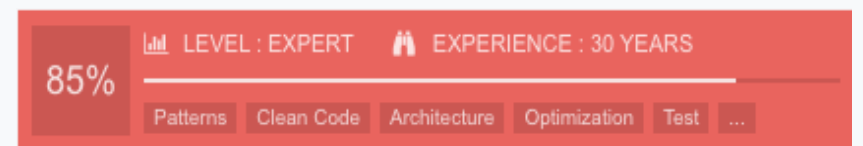

ARCHITECTURE (SECURITY)

The experience of Systems Architect provided me with security knowledge, as you cannot design infrastructure without security. The advent of Cloud Computing was a challenge, where some paradigms changed.

70% | LEVEL : EXPERT   EXPERIENCE : 15 YEARS

Authentication   Authorization   Perimeter Sec.   Sec. Comm   ...

INNOVATION

Innovation is not using new technologies; it is being able to do something with another point of view that has a satisfactory impact. No one is an expert in innovation, we can only say that we can contribute ideas with a different point of view.

50% | LEVEL : ADVANCED   EXPERIENCE : 7 YEARS

DEVOPS

I'm a natural DevSecOps
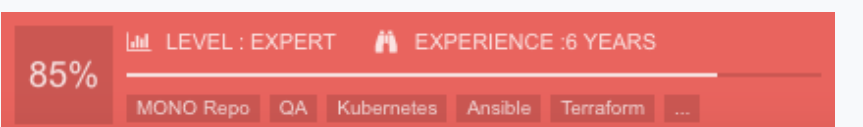

85% | LEVEL : EXPERT   EXPERIENCE :6 YEARS

MONO Repo   QA   Kubernetes   Ansible   Terraform   ...

PRESENTATION LETTER

I'm Juan Pablo Lázaro, a professional computer engineer who has always prioritized furthering my career from a position where I can prove my skills and help the company with what it needs, providing a clear and up-to-date vision.

I'm proactive by nature, always pushing for change and for strategic iniciatives integral for companies, fostering high performance in every field, basing it in teamwork. I know I have a lot to offer to your organization, so I invite you to review my CV in detail.

Most prominent among my qualities and background are:

More than 30 years of experience.
Highly analytical and technically updated tech leader qualified to offer efficient and innovative solutions.
Professional experienced in leading skills in every field of IT operations of development, security and infrastructure.

Proven experience in multifaceted project supervision, from start to finish.

Skilled to foster the introduction of technicological key solutions for the different needs of the clients and the dynamic business environment.

Thorough understanding of computer programming languages, operating systems, tools and technology. Expert in Cloud Computing with years of experience in Azure GCP and AWS.

Expert in formulation and implementation of cloud security and good practices.

Don't hesitate to contact me for any clarification on my curriculum. I hope we can meet soon, at your disposal.
